ACADEMIC PROJECTS

Data Analytics Project

- **Exchequer Dashboard** — Jan 23 – Feb 23
  - Description: A business intelligence tool that allows finance and accounting teams to visualize, track, and report on financial KPIs. We will input the ticker of a company/ personal use and within seconds, we will see in the screen two financial bar charts displaying company revenues and net income over time.
  - Technology: Pyplot, Dash and Python in-built libraries.
  - Team Member: Individual
  - Link- https://github.com/mohdmohsin123/Financial-Dashboard
- **SportSense** — Nov 22
  - Description: Developed a EDA model based on Indian Premium League which tells whole about the Sports and its players, worked upon the dataset from 2008 to 2017. As sports analysts, we find out the most successful teams, players and factors contributing win or loss of a team.
  - Technology: Python, EDA
  - Team Member: Individual
  - Link- https://github.com/mohdmohsin123/EDA-Sports
